MOBILE SENTRY™

Fixed video systems cannot give you visibility everywhere you need it. The Mobile Sentry™ portable security and surveillance system by Will-Burt enables you to rapidly deploy security monitoring where you need, when you need it.

Mobile Sentry™ is a trailer-based system that includes state-of-the-art video capabilities with a wide selection of camera options, mobile DVR for incident recording and wireless transmission for remote monitoring. It also includes multiple power and lighting system options. Finally, it incorporates a stable, internally-wired, tamper-resistant mast system for positioning cameras and lights up to 33.5 ft. above ground.

Mobile Sentry™ enables you to keep a watchful eye on people, valuable assets, etc. Whether monitoring crowds at special events, providing aid at crisis management scenes or guarding against theft and vandalism at construction, oil drilling or industrial sites, Mobile Sentry™ gives you continuous visibility.

Law Enforcement

Fixed installed video systems cannot cover all situations or locations where people monitoring is needed. The Mobile Sentry™ portable security and surveillance system enables you to be prepared for any situation that is out of the visual range of fixed video systems. From special events and random checkpoints to crisis management and disaster recovery, with Mobile Sentry™ you can place video monitoring capability where and when you need it.

Fire

Emergency situations are unpredictable, both for their location and timing. The Mobile Sentry™ portable video and lighting system enables you to light up or record traffic accident, fire or other emergency situations, wherever and whenever they occur. Mobile Sentry™ can be rapidly deployed to a location of need and quickly light and begin monitoring or recording the situation.

Construction, Oil & Gas, Industrial & Other Sites

When work or operational sites are temporary, fixed installed video monitoring systems are difficult or impossible. The Mobile Sentry™ portable security and surveillance system can enable you to locally or remotely monitor your valuable assets, helping you to guard against theft or vandalism.

FLEXI-TRAILER™ 10-11

Will-Burt has the credentials to deliver the quality and performance you expect in a critical portable security monitoring system. Will-Burt manufactures a variety of products used in military, law enforcement, fire, border patrol, towing, cellular, television broadcast and entertainment industries. When reliability is essential, customers turn to Will-Burt.

Telescoping masts and towers – Will-Burt is the world's premier manufacturer of telescoping masts and portable towers for the elevation of surveillance, lighting and antenna systems. We are the world's one stop shop offering virtually every payload elevation solution from one source. Will-Burt is also the manufacturer of Night Scan®, the #1 selling light tower in the world.

Will-Burt LINX™ Security Solutions – LINX™ delivers Access Control and Intrusion Detection Systems designed for government and civilian facilities that require the highest level of protection. The core LINX™ system is certified by the US Air Force and is the only system approved to deliver the highest level of military security – Protection Level 1 Nuclear (PL1N).

Will-Burt has been serving customers for nearly a century. The Company has operations at its headquarters location in Orrville, Ohio with manufacturing facilities also in Tulsa, Oklahoma and Waischenfeld, Germany.

Will-Burt is 100% employee-owned and has a strong commitment to the continuous improvement process set forth by its ISO 9001:2008 certified quality system.

CAPABILITIES

Mobile Sentry™ delivers security and surveillance capabilities where you need it. The trailer-based portable system offers remote monitoring of any situation, allowing you to observe people and protect assets.

The system allows for configuration to meet your requirements.

- Camera system: Mobile Sentry™ offers a variety of camera options, from two 180° cameras mounted on Will-Burt's proprietary pan positioner, giving you complete coverage of the surveillance area to Pan-Tilt-Zoom cameras, giving day or day-night capability and multiple zoom capability options.
- Mobile DVR system: IP/Analog with built-in GPS and 500GB storage capacity high resolution encrypted video. Can be

set for continuous recording, incident recording based on a trigger or set by schedule.

- Supports powerful central monitoring system for superior online viewing/tracking.
- Remote monitoring is capable from any location via 3G/EVDO/HSPDA interface.
- Mobile wireless router that can support up to 150 concurrent users.
- Power system can include battery, generator or a combination system.

We would be happy to work with you to select the proper camera configuration to meet your requirements.

VIDEO RECORDING AND MOBILE NETWORK

H4H Mobile DVR – Maximum Features and Security

The H4H is a high-end Hybrid H.264 MDVR that provides the perfect surveillance solution for vehicles or rugged environments. It is fully loaded with hardware and software characteristics to meet any market specification. The fully featured Mobile Witness Manager™ allows for live view, playback with Google Maps, and integration with Automatic Download, Health Monitor, and MobileLink™ software.

Features:

- 4-camera Analog or IP Megapixel camera system
- 500 GB SATA HDD Storage
- H.264 Wi-Fi 802.11 B/G/N
- Embedded Linux OS for maximum stability
- Resolution: D1, HD1, CIF (Analog); up to 5 MP (IP)
- H.264 video encoding
- Dual streaming video for low-bandwidth applications
- Support for USB AirCards (3G/4G)

Mobile Router – Dual Network Capability

Will-Burt's mobile router is a perfect fit for any mobile network. This router has been field tested in multiple environments and supports 150 concurrent users standard. It can be programmed to work with two Internet connections (3G and Wi-Fi) to prevent any loss of the Internet connection in the mobile environment. The router can also be programmed for load balancing between the connections to prevent slow connection speeds.

DVR with Quad LCD Monitor

Will-Burt's DVR with Quad LCD Monitor provides standard definition recording and video quality. This Microsoft Windows® based system is ideal for recording events that do not require watermarking and encryption. This combination unit is a convenient and cost effective solution for viewing and recording a variety of events from up to 4 cameras.

VIDEO MANAGEMENT SOLUTIONS

Mobile Witness Manager™

Mobile Witness Manager™ (MWM) is the latest web-based software that marries all the Mobile Witness software packages together. (Auto Download Server, MobileLink™, Fleet Witness and MWA). It has been designed with users' comfort in mind, so nothing is static; the software is 100% customizable bringing significant flexibility and power at the same time. Mobile Witness Manager™ is included with the purchase of the H4H DVR.

Features:

- Web-based
- 100% Customizable
- Integrated MobileLink™
- Integrated AutoDownload
- Integrated FleetWitness
- Live View
- Playback
- Real-time maps
- Snapshots
- Converting to .AVI
- DVD Burning

MOBILE CAMERA SYSTEMS

Will-Burt offers numerous camera system options. From Analog Standard Definition to Internet Protocol High Definition and from Fixed to Pan-Tilt-Zoom, Mobile Sentry™ can be configured according to individual customer application requirements.

MOBILE LIGHTING SYSTEMS

Will-Burt's Night Scan® is the #1 Selling Light Tower in the World

Now the capability of the Night Scan® is incorporated into Mobile Sentry™ with the capability of elevating spot/flood LED fixtures emitting 84,000 lumens of light output up to 18.5 ft. from ground level and 56,000 lumens up to 33.5 ft. That level of light output will illuminate both end zones from the 50 yard line and virtually any nighttime monitored scene with intense light.

MOBILE SENTRY™

ON

Flexi-Trailer™

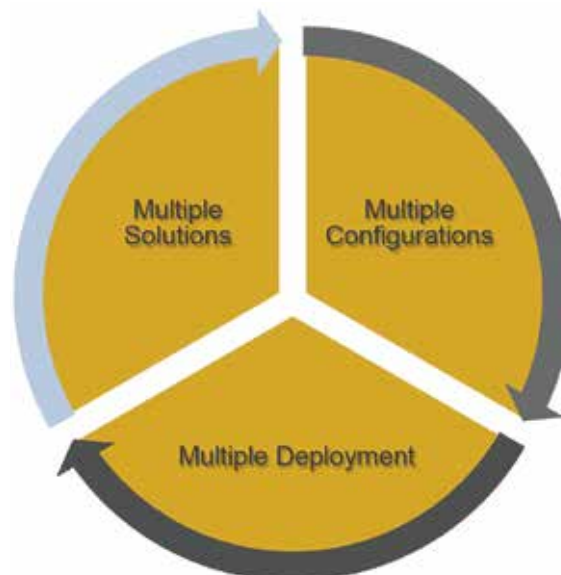

Flexi-Trailer™ is an optional mounting system for the Mobile Sentry™ security and surveillance system. Will-Burt's unique Flexi-Trailer™ system includes a rolling pallet upon which optional configurations are mounted. As the name suggests, the Flexi-Trailer™ system allows you flexibility in configuration, use:

Flexi-Trailer™ system includes:

1. Trailer – Aluminum, single-axle with ramp and stabilizers
2. Solution pallet
 - Self-contained standard or customized solution with video system, lights and/or power
 - Steel pallet with wheels, stabilizers and wheel lock mechanism

How it works:

- Each solution pallet is self-contained and autonomous
- A solution pallet may be transported to the location of need and either used mounted on the trailer or rolled off and used independently
- The pallet and trailer are outfitted with a rail and locking system to secure the pallet on trailer for transport

| Flexi-Trailer™ Advantages | Customer Benefits |
|---|---|
| Multiple uses for one trailer | Greater functionality, saves money – You can achieve more capability with one trailer and multiple pallet solutions |
| Leave pallet behind at point of need | You can use trailer to deploy other pallets or for other purposes |
| Use solution pallet on or off trailer | Flexibility of deployment – Deploy solution as the situation requires |
| You can acquire multiple solution pallets | Enables greater functionality Allows deployment according to need for a given situation Saves money – no need to purchase additional trailers Saves storage space – pallets take up less space than trailers |
| Expand number of sites being monitored | Saves money – no need to purchase additional trailer |
